Installation instructions

In order to install Single-Player CCG Kit, please follow these steps:

- Open Unity (you will need to use **Unity 2022.3.0 LTS** or higher) and create a new 2D project.
- Download and import the free [DOTween](#) asset from the Asset Store into your project.
- Select the *TextMeshPro/Import TMP Essential Resources* option in the *Window* menu. This will make sure you can use TextMeshPro in your project.
- Download and import the Single-Player CCG Kit asset into your project. **Make sure you import the kit as a complete project and that you answer "yes" when asked if you want to include the package dependencies. This will automatically install the package dependencies required: 2D Animation, 2D PSD Importer and Addressables.**
- The kit uses the new *Addressables* package in Unity to manage its dynamic resources. In order to be able to use the kit without any issues, you need to build the content before playing for the first time as follows:
 - Open the *Window/Asset Management/Addressables/Groups* window and click on the *Create Addressables Settings* button.
 - Select the *Tools/Single-Player CCG Kit/Build content* menu option.

And that is it! You should now be able to run the game from the editor by opening the scene named *Map* and clicking on the Play button.

You can find the complete, online documentation of the kit [here](#).

License

Single-Player CCG Kit can only be used under the standard Unity Asset Store End User License Agreement. A Copy of the Asset Store EULA is available [here](#).

The copyright of Single-Player CCG Kit and all of its contents belongs to gamevanilla ©. After purchasing Single-Player CCG Kit, you have the right to use it only for the purposes of developing and publishing a game.

You are NOT allowed to redistribute or resale Single-Player CCG Kit or any of its contents for any purpose (not even after a complete re-skin). To distribute or resale this product is NOT permitted under any circumstances and is strictly prohibited.

Please note that digital stores like the App Store or Google Play may reject your game if it contains very similar artwork to already published games. You may need to re-skin your game as appropriate.

Thank you for respecting our work.
